*Reason for Allowance*

1. Regarding claims 20-25, 28, 26-27, 29, and 44, the prior art fails to teach or suggest a connection admission control method for use in a communication network including multiple links comprising the steps of determining the maximum additional spare bandwidth needed, for each link, for rerouting the requested communication connection in addition to the spare bandwidth needed for rerouting all existing communication connections including the additional traffic rerouted and the traffic removed in the event of a single link failure; comparing the sum of the bandwidth needed for the requested communication connection and the maximum additional spare bandwidth for the requested communication connection with the available bandwidth for each of the links; and accepting the communication connection request if sufficient available bandwidth exists for each of the links, in combination with other limitations, as specified in the independent claim 20.

Regarding claims 45-52, the prior art fails to teach or suggest a connection admission control method for use in a communication network comprising the steps of determining the bandwidth needed for the requested communication and the maximum additional spare bandwidth needed and forming a total needed bandwidth for at least selected links: comparing the total needed bandwidth to available bandwidth for each of the selected links; responsive to the comparing, if sufficient bandwidth is available for the selected links, accepting the request, in combination with other limitations, as specified in the independent claim 45.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
